A FEW PROJECTS

Abimilho - <http://www.abimilho.com.br>

It is a Brazilian Association of Corn Industries. I developed all project: I was responsible for the layout, front-end and back-end. I used the following technology: PHP, Laravel version 5.0, HTML5, CSS3, SASS, jQuery, Node.js, and MySQL. I development the website in desktop and mobile version, I also created a CMS to manage news, recipes, curriculum, and more things.

Sindimetal - <http://www.sindimetalapucarana.com.br>

This project is similar to Abimilho, but there are more functionalities on the website and CMS. And using the 4.2 version of Laravel. (more details: <http://www.weblogic.com.br/cases/sindimetal> – it's in Portuguese-Brazil language)

ENV Volkswagen

I worked in partnership with The Front, agency of the events, I was responsible for developing the site front end.

The Front

It was my last project with ActionScript 3. In this project I developed the layout, front-end and back-end. Front-end I used ActionScript3 and JavaScript. As back-end I used Ruby on Rails 3, which you can manage: news, customers and jobs.

Tengo un Dinosaurio en Casa

It was in partnership with an agency RBA (<https://es.wikipedia.org/wiki/RBA>) for the development of the website in Adobe Flash, ActionScript3. I worked with Fernanda Lins (<https://www.linkedin.com/in/fernandalins>).

On The Software Design - <https://softwaredesign.ie>

While I was working on the SoftwareDesign I worked with many projects.

- Web App
 - o **SunExpress.com** e-commerce app on the airplane
 - o **eTeesheet.com** I worked remotely with a team in Texas/USA on the eTeeSheet project
- Website development in Wordpress and creation of plugins:
 - o Merlyn Shower, Repak, Nass, McCann Fitzgerald, Hsoc, Weir & Sons, etc..
- Scripts:
 - o I developed internal scripts, example: synchronize database data between one or more applications.

If you are more interest you can enter in my person website, it's <http://www.ricardocanelas.com>.
